DETAILED ACTION

Receipt is acknowledged of amendment filed on 1/18/05. Claim 9 has been canceled as per applicants amendment dated 1/18/05. Claims 1-8 and 10-15 are pending in the application and the status of the application is as follows:

The claims as amended are drawn to hair care compositions comprising components (a) and (b). The following new ground of rejection is necessitated by the amendment.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-8 and 10-15 are rejected less than 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is written description rejection.**

To satisfy the Written description requirement, applicant must convey with reasonable clarity to one skilled in the art, as of the filing date that applicant were in possession of the claimed invention. Applicant's claims are drawn to an amino functional polysiloxane (A) comprising alternating units of (i) drawn to formula with variables and (ii) a divalent organic moiety comprising at least one nitrogen atom and (iii) a monovalent organic moiety comprising at least one nitrogen atom. The hair compositions are formed using mixture of A and B. There is no description in the specification for the organic moiety, which can be divalent or monovalent.

Art Unit: 1615

There is no structure given to this moiety. **The specification gives no guidance to one of ordinary skill in the art the structure of this organic moiety.** The organic moiety includes plethora of compounds.

The expression “ organic moiety” without i.e. partial or complete structure does not convey to one of ordinary skill in the art that applicants were in possession of the claimed subject matter. The language recited without any correlation does not meet the written description requirement for the expression **organic moiety group** as one of ordinary skill in the art could not recognize or understand the **structure from the mere recitation**. Claims employing this language at the point of novelty, such as applicants’, neither provide those elements required to practice the inventions, nor “inform the public” during the life of the patent of the limits of the monopoly asserted. The expression could encompass myriad of compounds and applicants claimed expression represents only **an invitation to experiment regarding possible compounds.**

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1615

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
